TREWO is a Registered Canadian Charity No: 849907365 RR00001

WHY THE RIPPLE EFFECT (TREWO) IS IMPORTANT TO US ALL

Health continues to be a major concern for all Canadians. TREWO's goal is to mobilize individuals at the government, corporate and community levels to inspire change where it matters most – at a personal level.

Think of it as a ripple effect. A drop of information that challenges the status quo, that spreads in ever-widening circles to generate significant results, and help Canada maintain its global status as the gold standard in health care.

ABOUT Us and Our Mission

The Ripple Effect Wellness Organization (TREWO) is a registered Canadian charity dedicated to educating and empowering Canadians to lead healthy lives through proactive decision making.

Founded by Order of Canada recipient Dr. Sudi Devanesen and Ravi S. Juneja (one of the original founders and past presidents of the East Indian Professional Residents of Canada - EIPROC), TREWO bridges the care gap between physicians and patients by educating patients and those seeking medical advice or opinion.

Our mission is to create healthy communities by education and addressing health issues. Knowledge is the best preventative medication one can have.

Our Goals For 2019 & Beyond

TREWO will continue working with youth, to promote health and wellness, and will be supporting Health and Wellness Education campaigns at multiple Secondary Schools and Colleges and Universities.

TREWO will make a special effort to identify health risks particularly in youth, women and seniors where cultural sensitivity is required in difficult situations like accessing appropriate care, domestic violence, elder abuse and mental health. We continue to work with Seniors and the Falls Prevention Program at Trillium Health Partners (THP) and will work towards creating educational material which can be widely distributed both nationally and Internationally in several languages.

One of our main goals this year is to set up a Community Cardiac Education and Intervention Program with the THP Department of Cardiology.
